

ABOUT US

For over 10 years, we have been designing cutting-edge aluminium solutions for some of the most iconic buildings in the region. Engineered without compromise, our ranges of aluminium windows, doors and curtain wall systems have been specified time and again by the world's leading architects and construction companies.

As well as our wide range of standard aluminium glazing products, we also develop tailor-made solutions for all market sectors – from private domestic to high-rise residential and commercial to industrial. Our high-quality aluminium glazing products meet the most stringent demands in terms of comfort, security, architectural design, and energy-efficiency.

SERVICES

Airwerks Aluminium undertakes CIVIL works for Commercial, Residential and Infrastructure projects with fair, respectful and valued treatment of the entire project team from the owner, architects, and engineers and to the trade contractors, Team work and Integrity are our core values.

「 GLAZING
WORKS

A detailed close-up of a white window frame's cross-section. The image shows the internal structure, including the glass pane held in place by a black rubber gasket and a metal clip. The frame is set against a plain, light gray background.

「 FRAMELESS
GLASS

A photograph of a frameless glass railing system. The glass panels are held together by a metal clamping mechanism. The railing is installed on a balcony or terrace, with a blurred background of green and purple foliage, suggesting a garden or park setting.

A photograph of a modern building's glass facade. The glass reflects the surrounding environment, including trees and other buildings. A glass door with two vertical metal handles is visible on the left side of the frame.

ARCHITECTURE WINDOWS & DOORS

A photograph of a building facade featuring a series of horizontal aluminium louvres. The louvres are dark in color and are arranged in a grid-like pattern, creating a textured appearance. The background shows a clear blue sky.

PROJECTS

Modern cities are developing at an incredible pace, as new enterprises, plants, commercial facilities or housing estates appear every day. Therefore huge metropolitan areas still attract investors, and they, aware of obstacles resulting from the lack of space for new buildings, choose high-rise constructions, hence “multiplying upward” the space which can be used both by corporate and individual users. These are some of our projects in many different countries.
